

Prevent Tragic Workplace Accidents

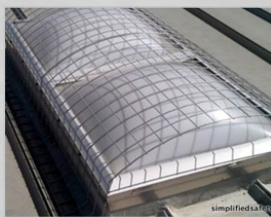

Accident prevention is a key aspect to protecting your company's assets.

Meets and exceeds OSHA regulations for fall protection. Tested and independently certified to be in accordance with OSHA fall protection for guardrail regulations, sections 1910.29 & 1926.500–1926.503.

A contractor was inspecting a roof for leaks and plunged through an unguarded skylight 30 feet to his death on a school gymnasium floor.

Cotterman & Company is a certified applicator of multiple roofing systems and can install safety rail systems to meet the manufacturer's specifications that will not compromise the integrity of your existing roof nor the manufacturer's warranty.

OSHA Regulation 29CFR 1910.23 (a)(4)

Every skylight, floor opening and hole shall be guarded by a standard skylight screen or a fixed standard railing on all exposed sides.

Highly effective as hazard barriers. Commonly used for rooftop fall protection, skylights, dock doors, new building construction and more.
